

Remaining Clusters Reorganized, Cluster 4 Sound Walls Go Up

Updated Cluster 3 and 4 configuration with traffic pattern

The Regional Water Quality Control Board (Regional Board) approved Shell's new configuration of clusters of homes for the Cleanup. This reconfiguration has many benefits for Carousel Tract residents; it will further improve safety and efficiency for the remainder of the project.

Residents who are immediately impacted by this reorganization in Cluster 5 and in adjacent homes have already been contacted about the change.

The Regional Board will host Community Meetings to address your questions and concerns regarding this reconfiguration. Please check your mailbox for an invitation coming soon.

So far, remedial construction work has been completed in Cluster 1 (nine properties) and Cluster 2 (ten properties). Work is currently underway in Cluster 3, which consists of 11 properties. Work on Cluster 3 is expected to be complete by late June 2017.

The ten residences in Cluster 4 moved out during the week of April 24th and the sound walls went up. The most notable impact to the neighborhood is the closure of 247th Street between Panama Avenue and Ravenna Avenue. This measure provides an added level of safety for the residents.

If you have any questions or concerns, contact the Regional Board:

Dr. Teklewold Ayalew, Regional Board Project Manager • (213) 576-6739 • Teklewold.Ayalew@waterboards.ca.gov
Susana Lagudis, Regional Board Public Participation • (213) 576-6694 • susana.lagudis@waterboards.ca.gov

You may also call the Shell Hotline at (310) 857-2335. Or drop by 24628 Marbella Ave. which is staffed by Shell's representatives Monday-Friday, 8-4 p.m.

Project related documents are available for public review at the following link:

California Water Services (Cal Water) Update

As Shell performs soil remediation work in the Carousel Tract neighborhood, Cal Water will continue to move and replace its water supply mains in the area. As part of the second and final phase of this project, Cal Water crews will install about 5,500 feet of new 8-inch water main, and move meter boxes and fire hydrants from customers' front yards to the sidewalk. This phase of the project is expected to take approximately 12 weeks.

Prior to starting the second phase of work, Cal Water will hand-deliver notices to residents in the area with updates. This information will also be shared with the Carousel Community Outreach Committee and the City of Carson. For updates, please visit www.calwater.com/carsonproject

Cleanup Activities Sequence

Cleanup activities may be subject to change

Your health and safety are top priorities. Please observe all traffic and “No Parking” signs for your safety and the safety of your neighbors. Thank you for your patience and cooperation.
